LIST OF TABLES	iii
LIST OF FIGURES.....	iv
LIST OF APPENDICES	v
LIST OF ACRONYMS.....	vi
ACKNOWLEDGEMENTS.....	viii
DISTRIBUTION LIST	ix
1.0 INTRODUCTION.....	1
1.1 SELECTED SITE	1
1.1.1 Operation and Ownership.....	3
1.1.2 Surrounding Property and Land Use.....	3
1.1.3 Climate	6
1.1.4 Suspected Contaminants.....	6
1.2 RISK ASSESSMENT OBJECTIVES.....	6
1.3 APPROACH.....	8
2.0 PRELIMINARY DATA COLLECTION	10
2.1 SAMPLING PLAN CONSIDERATIONS	10
2.2 ANCILLARY DATA NEEDS FOR EXPOSURE ASSESSMENT	10
2.3 SAMPLING QUALITY ASSURANCE & QUALITY CONTROL	11
2.4 TYPES OF SAMPLES COLLECTED	12
2.5 SAMPLING SITES	12
2.6 LABORATORY ANALYSIS OF ENVIRONMENTAL SAMPLES.....	14
2.6.1 CALUX Analysis	14
2.6.2 High Resolution Analysis	14
2.6.3 Blood Sample Analysis by AXYS.....	15
2.6.4 Field QAQC Samples	15
3.0 PROBLEM FORMULATION	16
3.1 PURPOSE OF A PROBLEM FORMULATION	16
3.2 IDENTIFICATION OF CHEMICAL HAZARD	17
3.2.1 Characteristics of POPs	17
3.2.2 Screening Contaminant Concentrations against Guidelines	17
3.3 IDENTIFICATION OF RECEPTORS.....	20
3.3.1 ID of Pathways	21
3.4 CONCEPTUAL EXPOSURE MODEL.....	24
4.0 EXPOSURE ASSESSMENT.....	27
4.1 IDENTIFICATION OF DATA NEEDS	28
4.2 INPUT TABLE	30

4.3	VARIABLE ENTRY INTO MODELING.....	32
5.0	HAZARD ASSESSMENT AND RISK CHARACTERIZATION	33
5.1	SELECTING A TOXICITY REFERENCE VALUE (TRV).....	33
5.2	MODELING RESULT	33
5.3	RISK CHARACTERIZATION FOR CARCINOGENS.....	34
5.4	BLOOD ANALYSIS.....	36
5.5	DISCUSSION	37
5.5.1	Modeled Exposures	37
5.5.2	Blood Analysis	38
5.6	GENERAL CONSIDERATIONS.....	40
5.7	UNCERTAINTY AND ASSUMPTIONS	40
6.0	PATH FORWARD TO RISK MANAGEMENT	42
6.1	EXISTING MANAGEMENT PLAN.....	42
6.2	SETTING RISK REDUCTION GOALS FOR THE SITE	43
6.2.1	Goals	44
6.2.2	Sub-goals and Indicators.....	44
6.2.3	Proposed Indicators.....	45
6.3	PROPOSED MANAGEMENT MEASURES.....	46
6.4	RECOMMENDING RISK MANAGEMENT ALTERNATIVES.....	49
6.5	IMPLEMENTATION PLANNING	50
6.6	RISK COMMUNICATION	51
7.0	SUMMARY	53
8.0	REFERENCES.....	56
9.0	CLOSURE.....	58

LIST OF APPENDICES

- Appendix A1 List of Samples Collected and Analyzed
- Appendix A2 Tables of Analytical Results
- Appendix A3 Raw Chemical Data
- Appendix A4 Parameterization of Risk Assessment Model

LIST OF ACRONYMS

CALUX	Chemically Activated Luciferase Gene Expression
CCME	Canadian Council of Ministers for the Environment
CIDA	Canadian International Development Agency
COC	Chain of Custody (form)
COPC	Contaminants of Potential Concern
EDC	Electricite du Cambodge
EIA	Environmental Impact Assessment
GCMS	Gas Chromatography Mass Spectroscopy
GIS	Geographic Information System
HCH	Hexachloro Cyclo Hexane
HHRA	Human Health Risk Assessment
HPT	Hatfield POPs Project Team
HQ	Hazard Quotient
HR GCMS	High Resolution Gas Chromatography – Mass Spectrometry
ILCR	Incremental Lifetime Cancer Risk
IR	Intake Rate
LE	Years Of Exposure
NC	National Consultant
NFP	National Focal Point for POPs
NIP	National Implementation Plan
PCBs	Polychlorinated Biphenyls
PCDDs	Polychlorinated dibenzodioxins or Dioxins
PCDFs	Polychlorinated dibenzofurans or Furans
PF	Problem Formulation
PIP	Project Implementation Plan
POPs	Persistent Organic Pollutants
POPs Project	Regional Capacity Development Program for Management of Health Risks of Persistent Organic Pollutants in South East Asia
PTS	Persistent Toxic Substances
QA/QC	Quality Assurance / Quality Control

RA/RM	Risk Assessment/Risk Management
RBCs	Risk Based Concentration,
SEDCW	Sambour EDC Warehouse (study site)
SF	Slope Factor
SOPs	Standard Operation Procedures
TCDD	Tetrachlorodibenzo-P-Dioxin
TCDF	Tetrachlorodibzofuran
TDI	Tolerable Daily Intake
TEF	Toxic Equivalence Factor
TEQ	Toxic Equivalence Quotient
TRV	Toxicity Reference Value
USEPA	United States Environmental Protection Agency
XDS	Xenobiotic Detection Systems Inc.

ACKNOWLEDGEMENTS

Hatfield Consultants and the POPs Project Team express our sincere thanks to the many individuals who have played significant roles to date in the *Regional Capacity Development Program for Management of Health Risks of Persistent Organic Pollutants (POPs) in South East Asia* (hereafter referred to as the POPs Project).

Special thanks are due to the World Bank Project Task Team, including Dr. Jitendra (Jitu) Shah, Dr. Catalina Marulanda and Manuel Cocco, for their support and assistance with all aspects of project implementation. We would also especially like to thank the Canadian International Development Agency's (CIDA) POPs Fund, for their financial support for the POPs Project.

We would also like to thank H.E. Mr. Heng Nareth, Ministry of Environment (MOE) Advisor, and Director of MOE Department of Environment Pollution Management and Control (MOE), Mr. Ken Choviran, the POPs National Focal Point for Cambodia for their kind support and insight. We especially thank Mr. Roath Sith, National Consultant, other key MOE staff members, and Mr. Chen Sophanna and other participants from Electricite du Cambodge (EDC) for their technical contributions and positive collaboration, which ultimately led to the success in the case study development and other project activities.

Our sincere thanks also go to all relevant national agencies for their active support and invaluable contributions to the POPs Project. We especially thank the participants of the National Training Workshop took place in Siem Reap, Cambodia, from 19-21 January 2009 for their valuable comments and suggestions for finalizing the present Risk Assessment for the Electricite du Cambodge Sambour warehouse and training facility site.
